

How to Draw a Classical Labyrinth

DRAWING A CLASSICAL THREE CIRCUIT LABYRINTH

The grid shows the progression of drawing a labyrinth:

- Row 1: Four diagrams showing the construction of a 7-circuit labyrinth by adding 'L' shapes to the corners of the seed pattern.
- Row 2: Three diagrams showing the construction of an 11-circuit labyrinth by adding more 'L' shapes to the corners.
- Row 3: Two diagrams showing the final 11-circuit labyrinth with a central vertical passage.

Drawing Labyrinths

The 7-circuit labyrinth is drawn as shown. To draw an 11-circuit labyrinth, add an "L" in each corner and follow the same plan as for 7:

How to begin an 11-circuit labyrinth
